Part 2. Observing Changes in the GIS Map

Now that you have mastered analyzing data from the 1790 census, try making some general observations about the data map when we change the census year. You may need to use your “Zoom” and centering tools to assist you.

1. Study the 1790 map. Click on “1800” to change the decade. As you switch from 1790 to 1800, describe three changes you see in the map, without clicking to access data:

a. _____

b. _____

c. _____

2. Study the 1800 map. Click on “1810” to change the decade. As you switch from 1800 to 1810, describe two changes you see in the map, without clicking to access data:

a. _____

b. _____

3. Study the 1810 map. Click on “1820” to change the decade. As you switch from 1810 to 1820, describe two changes you see in the map, without clicking to access data:

a. _____

b. _____

4. Study the 1820 map. Click on “1830” to change the decade. As you switch from 1820 to 1830, describe two changes you see in the map, without clicking to access data:

a. _____

b. _____

5. Study the 1830 map. Click on “1840” to change the decade. As you switch from 1830 to 1840, describe two changes you see in the map, without clicking to access data:

a. _____

b. _____

The BIG PICTURE:

Describe what generally happened to the population of the United States between the years 1790 and 1840, based on your observations above.
